Experience

Full-Stack Developer (Remote), OctaSys – London, UK

June 2025 – Feb 2026

- Built and deployed multiple full-stack web applications using Next.js and Node.js, delivering features from design to production
- Designed scalable system architectures and database schemas to support data-driven platforms
- Developed an AI-powered platform for discovering and comparing AI tools and APIs, including a recommendation system based on user input and prompt-sharing functionality
- Built a community platform enabling developers to publish AI-generated applications and connect with recruiters, implementing content submission, discovery, and interaction systems
- Engineered a developer analytics platform by integrating GitHub and Jira APIs, designing automated performance scoring systems and role-based dashboards for developers and managers
- Implemented cron jobs to automate data processing and keep metrics up to date
- Built admin tools for managing users and monitoring platform activity and performance
- Managed deployments, CI/CD pipelines, and Linux-based server infrastructure to ensure stable releases
- Accelerated development by using AI-assisted workflows while reviewing, refining, and maintaining production-quality code

Project Manager (Remote), OctaSys – London, UK

Sept 2024 – June 2025

- Led Agile software projects and coordinated cross-functional teams
- Designed Jira workflows and automations to improve task tracking and team efficiency
- Managed development lifecycle from planning through release

WordPress Developer (Remote), OctaSys – London, UK

Nov 2021 – Sept 2024

- Developed and maintained premium WordPress themes and custom features
- Translated Figma designs into responsive front-end implementations
- Diagnosed and resolved technical issues across production environments

Projects

Modsy Game Mod Sharing Platform

modsy.io

- Built a SaaS platform for game mod sharing using Next.js, Prisma, and MariaDB
- Designed role-based systems, dashboards, and moderation workflows
- Achieved 5,000+ visitors in the first week through organic traffic
- Managed infrastructure including Linux servers, object storage, CDN, and deployments

Frkn64 Modding Game Mods

frkn64modding.com

- Built and scaled a content platform reaching ~50,000 monthly users
- Created and published high-download game mods, driving consistent user traffic
- Managed SEO, performance optimization, and platform infrastructure

Education

Sinop University

Internet And Web Technologies Program | GPA: 3.62/4.0

Sinop, Turkiye

Jun 2021
