Professional Summary

Experienced QA Engineer and WordPress Developer with 8+ years of hands-on experience delivering production-ready websites and web applications. Strong expertise in WordPress development, manual QA testing, and converting Figma designs into high-quality, responsive builds. Proven background in server maintenance, migrations, deployments, and premium theme support. Recently expanded into AI-assisted web development, building applications from modern design prototypes. Open to remote or on-site opportunities in Europe or North America.

Work Experience

QA Engineer & AI-Assisted Software Developer

OctaSys – London, UK (Remote)

Jun 2025 – Present

- Built production-ready web applications from Figma Make prototypes using AI and Next.js.
- Designed application architecture, integrated third-party APIs, and managed CI/CD deployments.
- Performed manual QA testing (functional, regression, release) across multiple projects.
- Tested WordPress themes and plugins for compatibility, performance, and quality standards.
- Created and refined AI prompts to generate clean, scalable, maintainable code.
- Collaborated with designers and developers to ensure smooth prototype-to-production delivery.
- Managed server environments, migrations, and uptime optimization.

Project Manager

OctaSys – London, UK (Remote)

Sep 2024 – Jun 2025

- Led software projects (MagicAI, BookingHub) using Jira and Agile methodologies.
- Built Jira instances from scratch, implemented automations, and managed Slack alerts.
- Oversaw QA testing, documentation, server migrations, and team coordination.

Frontend WordPress Developer & Support Engineer

OctaSys – London, UK (Remote)

Nov 2021 – Sep 2024

- Developed premium WordPress themes (e.g., Hub, ArcHub, AI Hub).
- Translated Figma designs into responsive, pixel-perfect websites.
- Reduced support resolution time by 50% through hands-on debugging and issue analysis.
- Created end-user documentation and assisted in beta testing & QA.

WordPress Developer (Intern)

DYT Biotechnology R&D – Izmir, Turkey

Jul 2021 – Aug 2021

- Built and maintained the company's WordPress-based website.

Projects

Modsy.io · Founder & Full-Stack Developer

Nov 2025 – Present

- Founded and built Modsy, a modern mod-sharing SaaS platform for PC games.
- Designed a production-ready architecture using Next.js, React, Prisma, and MySQL (MariaDB).
- Implemented role-based access control, verified modder onboarding, and moderation workflows.
- Built SEO-optimized mod pages with dynamic metadata and structured data.
- Developed analytics, popularity algorithms, creator dashboards, and earnings-per-download features.
- Achieved 2,500+ downloads in the first week via organic traffic and Steam referrals.

Tech stack: Next.js, React, Node.js, Prisma, MySQL, Tailwind CSS, VPS, Object Storage, CDN, PM2, Git, SEO

Frkn64 Modding · Founder & WordPress Developer

Mar 2016 – Present

- Founded and operated a long-running modding brand for simulation games (ETS2, ATS).
- Created and published high-quality game mods with tens of thousands of downloads.
- Built and maintained a WordPress-based mod platform with custom themes and plugins.
- Achieved strong Google rankings and attracted ~50,000 monthly visitors.
- Managed hosting, performance optimization, security, backups, and uptime.

Education

Sinop University (Sep 2019 – Jun 2021)

Associate Degree in Computer Networks and Internet Technologies (**GPA:** 3.65)

Languages

Turkish (Native) | **English** (B1) | **German** (A1)

Core Skills

- QA & Testing (manual, regression, release validation),
- WordPress (themes, plugins, Elementor, QA),
- Frontend (HTML, CSS, React, Next.js),
- AI-Assisted Development (Codex, Claude, prompt engineering),
- DevOps (CI/CD, VPS, PM2, deployments),

Tools: Git, Jira, Freshdesk, Postman, Chrome DevTools
